

Measuring for Custom 6A and 6B

If you want your bottom post on the ground,
in front of the stair, measure accordingly

Custom 6B

Measure the rise and run of each step,
the nose to nose measurement and any
overhang, then give us a call.

The post will be in right next to the bottom
step and will require a longer post.

Custom 6A

Measure the rise and run of each step,
the nose to nose measurement and any
overhang, then give us a call.

The post will be in front of the bottom step in a
position that a regular sized post can be used.

* If you can e-mail a picture - that is very helpful *
