

## Custom 9A

EZ Rail with base plate modified to extend toward structure

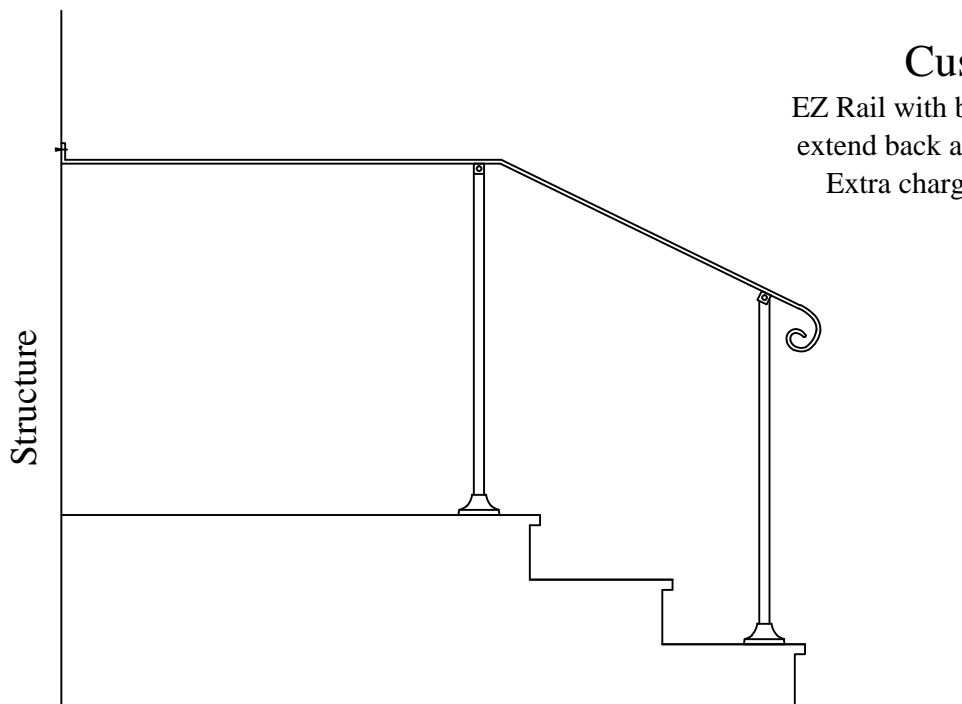

Extra charge: \$20.00 for bend

## Custom 9B

EZ Rail with base plate modified to extend back and attach to structure

Extra charge: \$20.00 for bend

These modifications have some limitations. If there are too many stairs or the landing is too long, we may need to splice the top rail because of shipping.

Drawing shows an EZ Rail with base plate, but we can also modify an in ground or core drilled rail
